Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 22-49 rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

Re. independent claim 22, steps a and b are only locating and obtaining a point, and claim 22 does not specify the practical application for mentioned point, however, the preamble of claim 22 disclosed "for display on a display screen". It still does not represent the data on a CRT or LCD or any tangible computer monitor. (see page 23 at first paragraph of Interim Guidelines for Examination of Patent Applications for Patent Subject Matter Eligibility, discloses when a claim applies a mathematical formula, e.g., as part of a seemingly patentable process, the examiner must ensure that it does not in reality "seek [] patent protection for that formula in the abstract.")

Regarding claims 37, 39, 43, 45-48 has similar matter as claim 22.

Claims 41 and 49 claimed modulaed carrier signal, merely claimed nonfunctional descriptive material, i.e., a modulated carrier signal does not make it statutory. (see, page 51 at first paragraph of Interim Guidelines for Examination of Patent Applications for Patent Subject Matter Eligibility, discloses when nonfunctional descriptive is recorded on some computer-readable medium, in a computer or on an electromagnetic carrier signal, it is not statutory since no requisite functionality is present to satisfy the practical application requirement.)
